OUT OF COMPETITION TESTING

ANY ATHLETE CAN BE TESTED OUT OF COMPETITION AT ANY TIME
Out-of-competition testing is an important tool in ensuring a clean sport.

If you are in the Registered Testing Pool (RTP) you will have to provide a daily 60 minute testing slot, however any athlete can be tested out of competition at any time.

Who can test you out-of-competition?

- Your own national anti doping organisation.
- An international body - IAAF- AIU, WADA or the IOC
- The national anti doping organisation of the country that you are in at that time.
WHAT TO EXPECT FROM AN OUT OF COMPETITION TEST

An Anti-Doping Officer will identify themselves to you either at home or at one of your regular activity locations. They will show you ID and ask you to sign a notification form and provide photo ID – TIP, keep a copy with you at all times. You will be advised whether it is a urine or blood test or both. For urine the tester will be same sex, if it is blood there will be a qualified person accompanying.

You will need to find a place to complete the test. You have the right to complete your training session, locate a representative, receive necessary medical treatment and find your photo ID. You will be observed and or accompanied while doing this.

For a blood test you will be asked if you have exercised in the previous 2 hours and asked to be sit down for 10 mins before providing the sample. THIS IS VERY IMPORTANT!
THE URINE SAMPLING PROCESS

You will be asked to complete a form like this one and to choose a sample collection pot. Always check that the sample pot is sealed.

• The Tester will accompany you to the bathroom and must observe at all times. You will need to provide at least 90 ml of urine. Divide the sample between the A and B vessels, close them in the correct way and replace them in the plastic bags provided, then place them into the storage box and seal it.

• Complete the form with the tester. Check all details and all sample bottle codes properly.

• Provide details of all medication and supplements taken in the previous 7 days. Check everything again and keep your pink copy of the form safe until your result is cleared.

• Remember to check that the yellow lab copy has no personal details.
THE BLOOD SAMPLING PROCESS

You can be blood tested at ANY time or place, In or Out of Competition. Athletics conducts more Blood Testing than ever before to protect our sport.

• You will be notified and asked to consent to give the sample. The process will be fully explained to you.
• You can have a representative and can ask the Blood Collection Officer (BCO) for proof of qualification to draw blood.
• You must have been seated for 10 minutes and rest for 2 hours (if you have been exercising). Choose a sampling kit, a small amount of blood will be drawn from your arm or hand. The BCO will apply a dressing after the sample has been taken.
• Verify that sample is properly sealed and check all code numbers.
• Accurately answer the questions on recent training, altitude visits and loss/receipt of blood.
• Accurately fill in any medication and supplements taken in the last 7 days.
• Sign the form and keep the Pink copy.
