

Athletics Integrity Unit confirms receipt of Moscow Laboratory data

20 June 2019, Monaco: The Athletics Integrity Unit (AIU) confirms that it has received from World Anti-Doping Agency (WADA) the data from the Laboratory Information Management System (LIMS) of the Moscow Laboratory in respect of samples analysed in Athletics in the period 2012 to August 2015.

The data package handed over to AIU representatives on 18 June contains approximately 110,000 files in total including all underlying raw data generated from analysis of the samples.

The AIU will start analysing the LIMS data immediately with a view to reporting its findings to the IAAF Council in due course.

Whilst the AIU is committed to making every effort to complete its review of the data as soon as possible, it is not in a position to say how long the exercise will take.

No further comment will be made at this time.

About the Athletics Integrity Unit

The Athletics Integrity Unit (AIU) is the independent body that manages all integrity issues – both doping and non-doping – for the sport of athletics. The remit of the AIU includes anti-doping, the pursuit of individuals engaged in age or competition results manipulation, investigating fraudulent behaviour with regards to transfers of allegiance, and detecting other misconduct including bribery and breaches of betting rules.

It is the AIU's role to drive cheats out of our sport, and to do everything within its power to support honest athletes around the world who dedicate their lives to reaching their sporting goals through dedication and hard work.
